

**January, 2014**

**Dear customers, suppliers and friends;**

We are pleased to send you our best wishes for 2014. Hopefully you can reach many of your goals, both professional, and personal.

For us, in Mexicom Logistics, the year begins in the best way. It is with great pride that we announce that for one of our most important Mexican export customers, the company Plastiglas, we have recently opened a Distribution Center in Hebron, Kentucky, in December 2013.

This Distribution Center will receive the products the company sends to its customers in the USA and Canada. From there, we will make the distribution to our customer's buyers, offering a better response to orders and being able to supply the required material within 2 or 3 days. In the past, Plastiglas provided an average of 15 days transit time once an order was received, directly from the plant in Mexico. It goes without saying that having a distribution center has improved Plastiglas' competitiveness and heightened its participation in USA's local market.

The same system can be reproduced for other customers that deliver merchandise in the US.

Some of the benefits you get are:

- Shorter transit times
- Total visibility of inventory
- Deliverability 24/7 to any destination in the U.S. and Canada
- Better control on storage costs
- Flexibility to repackage the product by piece, not only by pallet
- We can also consolidate different suppliers in the U.S. and we ship to Mexico in complete trucks.

If you wish, you can by clicking on the links, check out a couple of videos from

our new Distribution Center.

We are excited about the start of operations of the Distribution Center and we look forward to serving other exporters to exploit the advantages of being closer to their end customers in the North American market.

We appreciate the trust you put in Mexicom Logistics, we will continue bringing our best to provide the service you deserve.
